

SciLifeLab

Day 2015

The human
proteome
&
Personalized
medicine

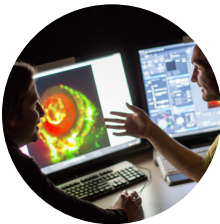

April 29

Aula Medica, Nobels väg 6, KI Campus Solna

Scientific highlights

SciLifeLab researchers contribute to almost two scientific publications every day. At this event, we put forward the work behind a few of our most exciting high-impact papers.

Platform presentations

As a national center, SciLifeLab offer techniques and know-how to Swedish researchers within molecular biosciences. Come meet our platforms and learn about our services.

Keynote lectures

The event features top scientists, such as Catherine Costello, Matthias Mann, Bernhard Küster, Olli Kallioniemi and Mathias Uhlén. Also, Göran Sandberg will give a talk on the role of Knut & Alice Wallenberg Foundation in life science.

Science-Art exhibition

To explore the interplay between art and science, we have invited artists with connection to, or inspiration from, SciLifeLab scientific endeavours to exhibit their work.

The event is free of charge. View detailed program and register at www.scilifelab.se

About SciLifeLab

SciLifeLab has been created by the coordinated effort of four universities in Stockholm and Uppsala: Stockholm University, Karolinska Institutet, KTH Royal Institute of Technology and Uppsala University.
